EDUCATION

BSc Computer Science
Calicut Universtiry
(2021 - 2024)

MEARN Stack
Luminar Technolab
(2024 - Present)

SKILLS

- React
- Redux Toolkit
- HTML
- CSS
- JavaScript
- MongoDB
- Node/Express

SOFT SKILLS

- Adaptability
- Time Managment

PROFILE

Recently completed Bachelor's in Computer Science and passionate about creating efficient and user-friendly applications. Eager to apply my technical knowledge and quick learning abilities to contribute to a dynamic team and grow within a developer role.

PROJECT EXPERIENCE

Recipe Sharing Platform

Developed a full-stack recipe-sharing platform using the MERN stack (MongoDB, Express, React, and Node.js). Integrated JWT authorization and password hashing for secure user authentication. Implemented full CRUD functionality to allow users to create, read, update, and delete recipes efficiently.

Todo Management

Built a client-side todo management platform using React and Redux Toolkit. Allows users to add, delete, and mark todos as completed, with a pie chart visualization showing the ratio of completed vs. total todos. Redux Toolkit is used for efficient state management and to handle actions on todos

Movie Search Website

Developed a movie search website using React, where users can search for movies and view detailed information such as the movie's title, description, and poster. Integrated Axios to fetch movie details from an external API, providing users with up-to-date movie information.

Document Management

Created a document management app using React, where users can add documents with a title and description. The description is edited using the React Quill library for rich text formatting. Implemented full CRUD operations (Create, Read, Update, Delete) with Firebase for real-time database management, ensuring smooth document handling and storage.
